

Gateway from THEye TH-2 to THEye Cloud, including alarm management.

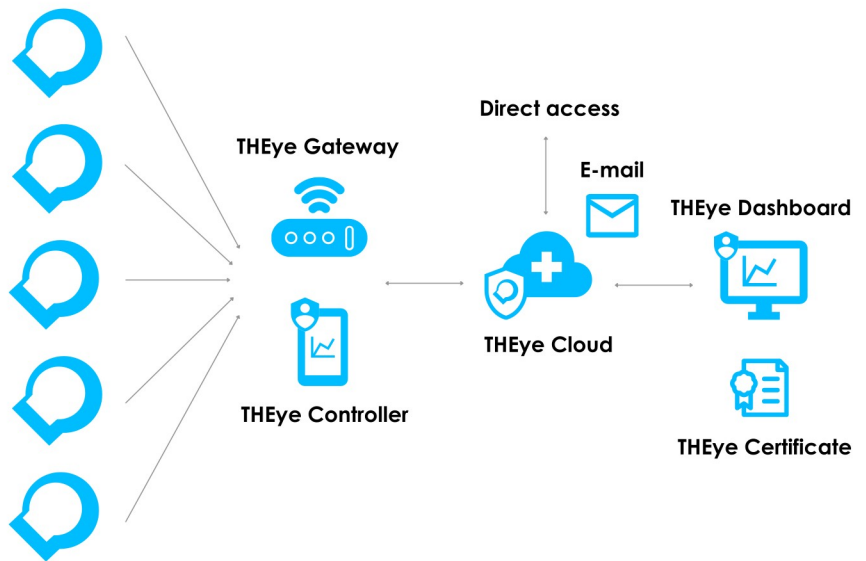

ref : THEye Gateway T1

Key features

- Automated data download from THEye TH-2 to THEye server
- Detection of sensor limit exceedances (temperature and humidity)
- Audible and/or email alarm when limits are exceeded
- Range up to 15m depending on obstacles (walls, windows, furniture, etc.)

IoT platform

THEye TH-2

Configuration

- Synchronization frequency
- List of synchronized and monitored sensors
- Audible alarm
- Configuration via the « THEye Controller » application
- Internet access and THEye Gateway lock
- ...

Communication

- Bluetooth® 5 LE
- Wi-Fi 5.0 and Ethernet

Dimensions

- Width: 93.8mm
- Height: 62.8mm
- Thickness: 32.8mm

Power

- USB-C 5V 3A
- PoE IEEE 803.3af

Application

« THEye Controller » is a secure application designed to control the components of the THEye platform. The application is available for download from app stores.
